MANAGEMENT DISCUSSION AND ANALYSIS

OVERVIEW:

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956, guidelines issued by the Securities and Exchange Board of India (SEBI) and the Generally Accepted Accounting Principles (GAAP) in India. Our Management accepts responsibility for the integrity and objectivity of these financial statements, as well as for the various estimates and judgments used therein. The estimates and judgments relating to the financial statements have been made on a prudent and reasonable basis, so that the financial statements reflect in a true and fair manner the form and substance of transactions, and reasonably present our state of affairs, profits and cash flows for the year.

INDUSTRY STRUCTURE AND DEVELOPMENT:

Changing economic and business conditions, evolving consumer preferences, rapid technological innovation and adoption and globalization are creating an increasingly competitive market environment that is driving corporations to transform the manner in which they operate. Companies in this environment are now focusing even more on their core business objectives, such as revenue growth, profitability and asset efficiency.

Technology has evolved from merely driving cost efficiency. It is now also driving tangible business value. The ability to define, design, develop, implement and maintain advanced technology platforms and business solutions to address business needs has become a competitive advantage and a priority for corporations worldwide.

As a result, there is an increasing need for highly-skilled professionals in the market to help corporations transform their business, optimize operations and drive innovation by leveraging technology. At the same time, enterprises are reluctant to expand their internal IT departments and increase costs. These factors have led to the increased reliance of corporations on their outsourcing providers and are expected to continue to drive future growth for outsourced technology services.

India is widely recognized as the premier destination for offshore technology services. According to the NASSCOM Performance Review 2013, IT-BPM exports (IT services and Business Process Management) from India are estimated to grow in fiscal 2014 by 12-14%, to US \$85–87 billion. There are several key factors contributing to the growth of IT and IT enabled services (ITES) in India and by Indian companies.

OPPORTUNITY AND THREAT:

We believe our competitive strengths include leadership in sophisticated solutions that enable clients to deliver improved business results in addition to optimizing the efficiency of their business, our proven Global Delivery Model, commitment to quality and process execution, strong brand and long-standing client relationships, status as an employer of choice, ability to scale, innovate and lead makes us a competitive player.

We seek to further strengthen our position as a growing company by:

- Strengthening our strategic partnership with our clients
- Increasing our relevance to clients by being able to work in the entire spectrum of their business, and
- Delivering higher business value to clients through the alignment of our structure and offerings to their business objectives.

To achieve these goals, we seek to increase business from existing and new clients, continue to enhance our engagement models and offerings, expand geographically, continue to develop deep industry knowledge, pursue alliances and strategic acquisitions, enhance brand visibility and continue to invest in infrastructure and employees.

OUTLOOK, RISK AND CONCERNS:

This section lists forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these statements as a result of certain factors. This section lists our outlook, risks and concerns:

- Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.
- We may not be able to sustain our previous profit margins or levels of profitability.
- The economic environment, pricing pressure, and decreased employee utilization rates could negatively impact our revenues and operating results.
- Our revenues are highly dependent on clients primarily located in India, as well as on clients concentrated in certain industries, and an economic slowdown or other factors that affect the economic health of the India or those industries, or any other impact on the growth of such industries, may affect our business.
- Our success depends largely upon our highly-skilled technology professionals and our ability to hire, attract, motivate, retain and train these personnel.
- Any inability to manage our growth could disrupt our business and reduce our profitability.
- Intense competition in the market for technology services could affect our cost advantages, which could reduce our share of business from clients and decrease our revenues.
- Our revenues are highly dependent upon a small number of clients, and the loss of any one of our major clients could significantly impact our business.
- Our success depends largely on our Management team and key personnel and our ability to attract and retain them.
- Our client contracts can typically be terminated without cause and with little or no notice or penalty, which could negatively impact our revenues and profitability.
- Our engagements with clients are singular in nature and do not necessarily provide for subsequent engagements.
- Our client contracts are often conditioned upon our performance, which, if unsatisfactory, could result in less revenue than previously anticipated.
- Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and in the industries on which we focus.

INTERNAL CONTROL:

Our operations are less energy-intensive than those in the manufacturing sector. However, we have taken significant measures to reduce IT infrastructure's energy consumption by adopting a multi-pronged strategy. Energy efficiency is one of our key architecting parameters, along with performance, scalability, security and availability. This, coupled with the advantage of performance improvements and energy efficiency of the latest equipment deployed as per our technology refresh cycle, directly contributes to optimized energy consumption.

HUMAN RESOURCE DEVELOPMENT & INDUSTRIAL RELATION:

Our culture and reputation in the technology services industry enables us to attract and retain some of the qualitative talent in India. Our professionals are our most important assets. We believe that the quality and level of service that our professionals deliver is among the highest in the global technology services industry. Our employees receive competitive salaries and benefits. Competence development of our people continues to be a key area of strategic focus for us.
